

[中文](#)

Technological advances like cloud, big data and artificial intelligence (AI) are creating new market opportunities. As the pace and widespread adoption of technology and innovation continue to accelerate, organisations should take the lead on defining digital ethics.

The 10th Business Ethics Forum (BEF 2019) brings together influential leaders and key regulators to share insights on Business Ethics in the Digital Era from different perspectives. We are also honoured to have **Mr Paul Chan, Financial Secretary of The Government of the Hong Kong SAR**, to be our Keynote Speaker and to deliver Opening Remarks, and **Mr Ashley Alder, Chief Executive Officer of Securities and Futures Commission**, to be our Luncheon Keynote Speaker.

Simultaneous translation (English and Mandarin) will be available.
