Meta Metopia Technology Compay Limited	Meta Metopia is a trailblazing Web 3.0 infrastructure service provider that is revolutionizing the way we interact with the internet. With a mission to build the largest Web 3.0 public chain platform, Meta Metopia is deploying cutting-edge location-based Web 3.0 edge and cloud network nodes.	metopia.cc	Web3.0 + AI Digtial Transformation Support Program	Digital Payment Solutions and Shopfront Sales	<p>The first phase of the Metopia project aims to provide technology and operational solutions for digital payments and front-end sales to small and medium-sized enterprises (SMEs). Here are the detailed aspects of the plan 1. Multiple payment methods Metopia collaborates with partner EFT Pay to offer various payment options, including Alipay, WeChat Pay, FPS PayMe, Octopus, Visa, Mastercard, Union Pay, and FPS. In the first phase, the rates for Alipay(HK/CN) 1.4%, WeChat Pay(HK/CN) 1.1% , and FPS 0.9% will be lower than the market rates to provide a more competitive payment solution. 2. AI Order service Metopia will provide an AI Order service integrated into WhatsApp and WebApp, allowing AI-guided order completion for customers. This service offers merchants a convenient solution for synchronized online and offline ordering, enhancing the purchasing experience for consumers. 3. DID and Web3.0 wallet Each consumer will be assigned a Decentralized Identifier (DID) along with a Web3.0 wallet. The entire Web3.0 backend will be deployed on the Hong Kong public blockchain, ensuring service stability and security. This design enhances transaction transparency, security, and privacy protection for users. Optional Feature 1 Front-end App development for merchants Metopia will develop a front-end App that complements the basic functionalities for merchants. This App will provide merchants with more autonomy and customization options. Additionally, the management backend will open merchant DID and integrate with the DID subdomain system, further enhancing merchant management and brand display capabilities. Optional Feature 2 High-speed network packages and distributed storage devices Merchants can choose to purchase 5G broadband unlimited data packages provided by Metopia in collaboration with telecom operators, which include a fixed IP and router. Moreover, merchants can utilize a 4T Hong Kong public blockchain distributed storage device to earn points. This setup ensures stable network connectivity and efficient data storage, providing better support for the operational needs of merchants. These are the detailed aspects of the first phase of the Metopia project.</p>
